ABSTRACT

The DGTEK team has been in the financial and crypto world for over a decade, and during this time we've seen the rise and fall of several ambitious crypto and non-crypto projects. With our firm belief of learning from the mistakes of others, our team has come up with a foolproof plan that executes our vision to harness the power of crypto and firmly tether it to the existing financial world for profit-building.

At the core of our ecosystem is the DGTEK Crypto token to (USDG) - an ambitious endeavor to breathe new life into a unique segment of the financial industry. We believe in building on nothing but the best, and this is why we have chosen to build our digital foundation on the Binance Smart Chain. Our unique business and finance ecosystem splits rewards into liquidity pools for higher earnings and instant cash-outs. Holders of our token get to participate in earning programs within our ecosystem, with exclusive bounties and gifts for our best participants

EXECUTIVE SUMMARY

In 2008, everyone was stunned by the launch of a new product called **BITCOIN** was a revolutionary change in the world brought about by two programmers named Satoshi Nakamoto and Martti Malmi. They registered a new domain called "bitcoin.org." In the same year, Nakamoto came up with a new document, exclaimed it as a whitepaper with a headline- "Bitcoin: A Peer-to-Peer Electronic Cash System." In the next coming month, few more innovations were made; and all of these started and ended in 2008.

And now, it's 2024. Thousands of new digital currencies have evolved. The crypto and the blockchain world have just given everyone more than their expectations. The rewards and the benefits are just wondrous.

Several virtuous financial institutions/companies including, JP Morgan, PayPal, Fidelity have acknowledged cryptos' flair. The latest name on this list is "Tesla." Elon Musk has shown interest in cryptocurrencies, which increased in its price. Let's have a look at all the above-mentioned name in deep;

- JP Morgan- It started banking Coinbase and Gemini. Visa and Mastercard offered services to crypto companies. PayPal launched a new service, enabling users to buy, sell, and hold cryptocurrencies.
- Fidelity started a new Bitcoin index fund, which appears to be wall street's play for high-dollar institutional crypto belts.
- Tesla has purchased \$1.5 billion worth of cryptocurrencies.

PROJECT INTRODUCTION

Retail payment and banking are the lead heroes in the functioning of the economy. There are huge global market challenges that retailers are facing including, lower customer satisfaction, hyperinflation, terrorism, ethnic violence, and high unemployment. To upgrade value offerings, retailers are adopting innovative technology like blockchain.

Technological advancements have upgraded the payment system in every possible way. But, these technological advancements have affected the two key aspects; firstly, the traditional ledger books were transformed into an electronic form, which assisted in escalating the transaction speed and reduced operational cost. Secondly, it was cost-effective.

Thus, the acceptance of blockchain technology grasped a raging speed. In the last decade, the market has seen a huge acceptance of blockchain technology. And, today, even though all the leading banks and financial institutions across the globe have already been interested in blockchain technology and cryptocurrencies, hardly there is any way to spend it. Crypto holders have to convert the cryptocurrencies into fiat currencies to use for real-world transactions.

But still, a lot of problems like security, third-party service failure, user error, privacy loss, counterparty fraud, high transaction fees, etc, exist. A platform is required that can help with the ease of doing business. It is quite troublesome to look into the future. But, if technological advancements are used at its best, then it is for sure that the future is holding something better for all of us at the end of the road.

Moreover, everyone has to convert the crypto for all retail and banking services. There is also a high problem of high price volatility of cryptocurrency, that customers and retailers have to deal with.

The network can tell you where the coin is spent but by whom, it won't reveal as blockchain technology secures it.

Accessibility

Digital currencies has the power to provide the unbanked with a low cost financial refuge. Peer-to-peer transactions and digital currency denominated by banks It allows the low- cost way to manage wealth. In theory, assuming the backing of a financial system, digital currencies could ultimately help bring many out of poverty by letting capital flow more easily.

UNTRAPPED AUDIENCE

According to the world bank records, 3/4's of the world's poor are unbanked. Businesses could potentially have access to millions of customers who have 'unbanked' money, but there are some people who doesn't have bank accounts there are multiple reasons as they don't like to visit bank again and again, or some use to avoid because banks charges the fees for different services like cheque book service fees between 1.5 percent and 10 percent for each transaction. Some people can't afford it and they avoid to use the services of banks.

In this case, **DGTEK** Exchange provides the services which are based on low cost, secure tender, could allow for the 'unbanked community' to constructively participate in the economy again
